

Ala

Series of occasional tables in solid oak or birch. Tops are available in oak, birch, limestone, concrete and Rakú ceramic. Our birch products are treated with oil that has white pigment added and our oak products are treated with standard oil. There are also other surface treatments available, such as other oils, soft soap and paint (legs only), at additional cost.

The limestone tops are treated with soft soap, which seals the surface and keeps the light characteristics of the Gotlandic stone. This treatment protects well against stains if the surface is wiped clean quickly. All limestone contains fossils, small chips and pores that can be spotted.

The concrete tops are cast with a higher edge which gradually slopes down towards the center. These are available in sizes 35 x 35 cm and 85 x 35 cm.

Tops in Rakú ceramic are available in size 35 x 35 cm and are made by the artist Dan Leonette. Rakú is a special burning technique that takes place at high temperature and where a mix of woodchip and paper is used to create the different colours and patterns in the ceramic surface that makes each item a unique piece of art.

Ala with two drawers is only available in height 73 cm.

Design: Kristian Eriksson
